

Data Collection Solutions from *Prism Enterprises*

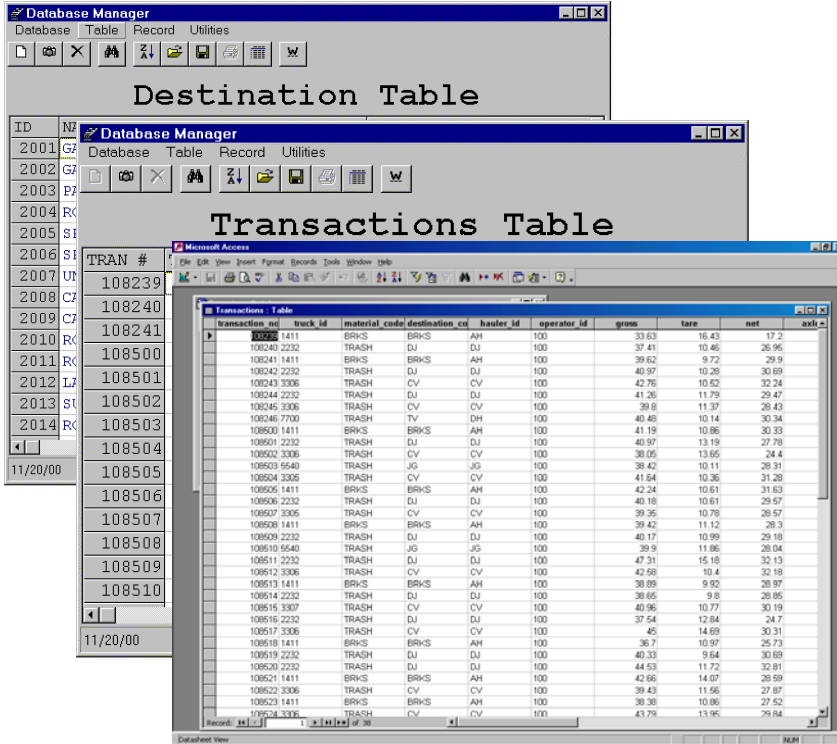

Scale Sentinel is designed as a companion to the GSE 60 series process controllers. This software provides the ability to maintain source databases and collect transactional data from these instruments regardless of the application or database set up on the controllers. The data is maintained in industry standard Microsoft ACCESS database tables.

Upload source data
to the controller(s).

Scale Sentinel installed in the tray, ready to receive data.

Use ACCESS to manage your data

Features.....

- 32 bit windows application
- Uses industry standard ACCESS database tables
- Works with ANY GSE controller application program
